11-26-82

Dear Mr. Weisberg

Please forgive this paper as it was all I could find here today. It's a holiday & no one is in today. But, your letter last Monday and as usual am glad to hear from you.

I finally talked to Dr. Chapman again tonite at 8 p.m. He has evening hours M/W/F at about 7 p.m. I called at 7:30, his nurse Carlos is actually a friendly type woman on the phone. told me he was in w/a patient. I told her I'd call back about 8, and did so. He just finished with his patient, and was in a hurry but rosso on the phone. I was in a hurry also, as we change assignments on the hour. He was friendly, told me his wife had just got out of the hospital & time was tight. He said he'd be glad to meet me once things settle down for him. I told him I have 4 days off next weekend (Dec 4-7) and that seemed OK w/him. I told him I'd call him mid or Friday to set up a time. Hope it goes through this time.

Here's a theory combining Dr. Chapman & your experiment w/Cartano

+ A round is fired from CE0's lemster bullet swipes & recoil to brace the rifle & CE0, to make sure a connection is detected. The empty hull is replaced in CE0's chip, second one down. A quick glance would show that hull was empty. Or a reloaded shell put in w/powder powder to be a dud almost. CE0 fires #1, works bolt, #2 doesn't fire (empty or misfire). He has to be privy to excessive force to eject, shell, Russian roulette. The gunman on Dal Tex then fires #2

(OVER)

Kathy Kennedy. LHO fires #3, on Dallas-Ft Worth. simultaneous, possibly along w/ someone on knoll. It's just an idea, but if an empty shell or bad round were placed in chp, the force might've used the pressure force to work bolt, raising the screws in the shell. I just don't really feel LHO pulled that rifle though. Nothing in his actions when in custody shows him as a man with something to hide - like shooting the president. He may not have been a nice guy, but I just don't think he knew, I do rather feel he wasn't meant to live long enough to be arrested.

Please forgive my handwriting - I'm still beat from all the holiday preparations for yesterday. Have set 2 days to get up now. Hope Thanksgiving was ok for you & family. Will write as soon as I speak to Chapman. Still have to return to Ford Library Dec 6 or 7. Best wishes,

Jan
